

SMH Rehabilitation Unit Outcome Data: January - December 2009

We would like to share information on our most recent outcomes:

- * Patient satisfaction with the services provided*
- * Number of patients who received treatment according to diagnosis*
- * Average length of stay on the Rehab Unit according to diagnosis*
- * Percent of patients discharged home (vs. nursing home)*

Realize that every patient is different, and individual results vary depending on the severity of the problem, their other medical diagnosis and their level of independence before admission to the hospital.

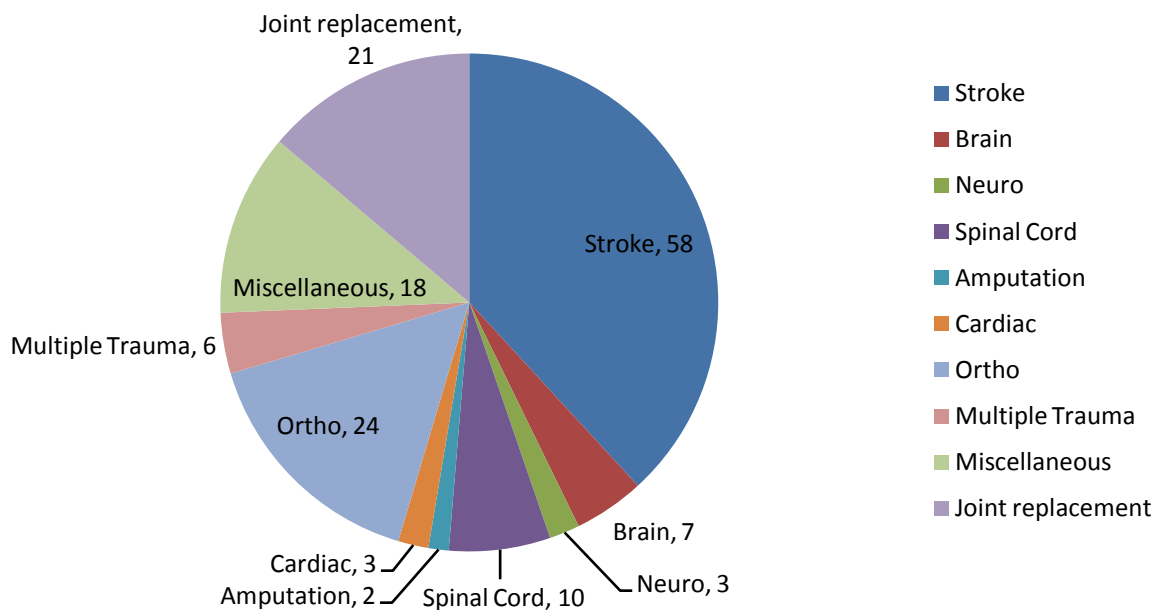

Patient Satisfaction

94.3% satisfaction for 2009.

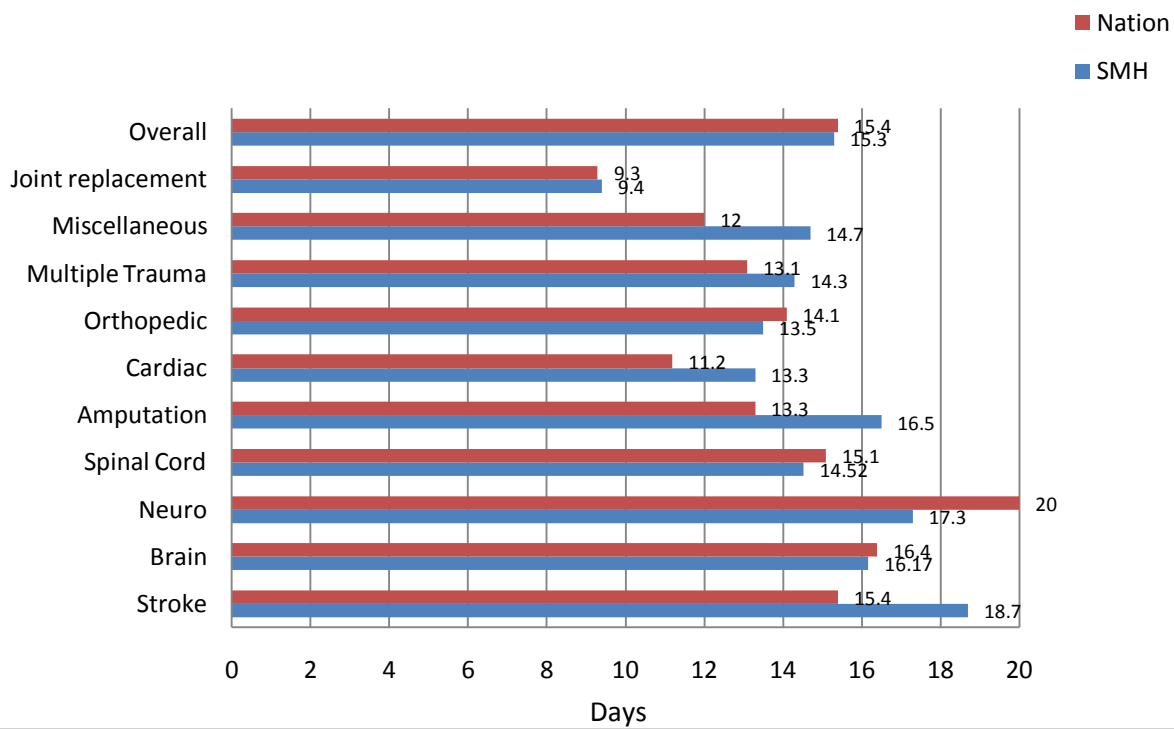

100% of those responding stated they would recommend the SMH Rehabilitation Unit to others.

Patient Satisfaction Scores are from surveys conducted internally.
